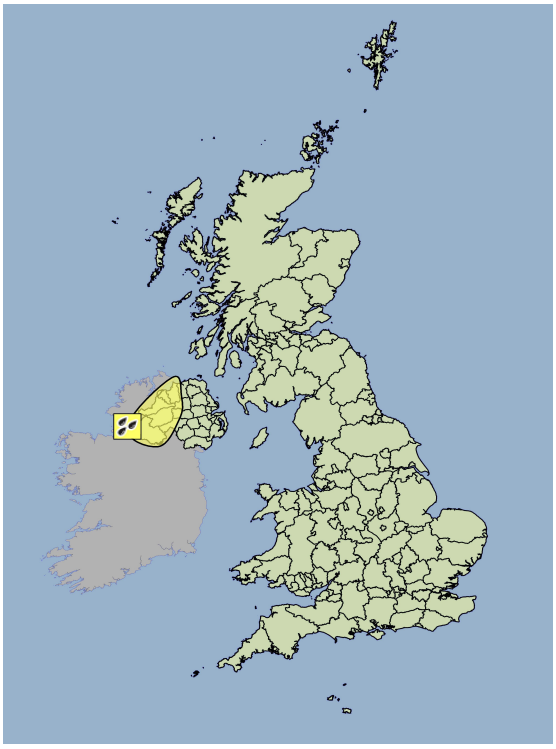
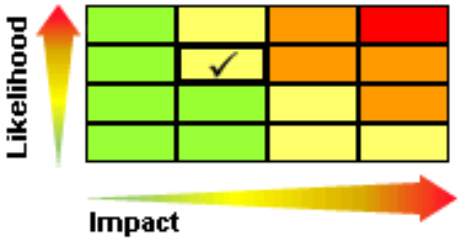
# National Severe Weather Warning Service





**Chief Forecasters Assessment**
A frontal zone will become slow moving across Northern Ireland and will bring a lengthy spell of rain and strong winds. Rainfall totals of 25-40 mm are expected quite widely in the west, with 60 mm or more possible over the hills. Given saturated conditions some localised flooding is likely. There is some uncertainty over the timing and areas affected by the heavier rain, so this warning will be kept under review and updated if and when necessary.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **21:00 on Fri, 04th Dec 2015** until **23:00 on Sat, 05th Dec 2015**

Outbreaks of rain will become persistent and heavy at times from Friday evening and will last through most of Saturday, before clearing later on Saturday evening. Please be aware that some localised flooding and low level disruption to travel looks likely.
